## Development Notes

Delivered footage as requested from an active investigation to LCPD president upon his request in the first week of the month.

Actively attempting to get 2 cameras back online, with support from IT for location for **XXXX School**.

**Actively Scheduling maintenance** calls for the remaining cameras that are out of service.

Cloud recording was commenced per camera

- Most cameras required a firmware update to enable remote downloading of files
- Files are produced in 10 minute increments, the list of files available is downloaded at 1am, the files are downloaded between 2am and 6am.

This months developments (from previous month, did not achieve during October):

- Residents with cameras will be emailed to setup a portal account so they can access their cloud storage footage starting mid-next week as each camera is brought into cloud recording. (Starting next week).
- *Ongoing:* Technology Committee needs to meet in order to review current developments and formalize a method for reviewing stored footage in response to an incident. (When a meeting can be scheduled).
- *Ongoing:* Re-sampling and retrieval of cloud footage.
